**This file format is used by digital instruments and contains information about musical notes.**

This file format is used by digital instruments and contains information about musical notes.

**.MIDI**

This audio file format uses the  
Windows<sup>®</sup> Media Player for  
playback.

This audio file format uses the  
Windows<sup>®</sup> Media Player for  
playback.

**.WMA**

This audio format is the standard  
for Apple<sup>®</sup> computers.

This audio format is the standard  
for Apple<sup>®</sup> computers.

**.M4A**  
(.AAC)

These two audio formats are used for streaming over the Internet.

These two audio formats are used  
for streaming over the Internet.

**.MP3 & .WMA**

# VIDEO

This video file type uses the Quicktime<sup>®</sup> player and is the standard for Apple<sup>®</sup> computers.

This video file type uses the Quicktime<sup>®</sup> player and is the standard for Apple<sup>®</sup> computers.

**.MOV**

**This video file format is the one  
used for DVDs.**

This video file format is the one  
used for DVDs.

**.MPEG-2**

**This video file is the standard  
format for PCs.**

This video file is the standard  
format for PCs.

**.AVI**

**This file format uses the  
Windows<sup>®</sup> Media Player and is  
built to stream over the Internet.**

This file format uses the  
Windows<sup>®</sup> Media Player and is  
built to stream over the Internet.

**.WMV**

**This video file type is commonly used to embed videos on the Internet.**

This video file type is commonly used to embed videos on the Internet.

**.FLV**

This video file format is the standard for Internet streaming sites like *YouTUBE*, *Vimeo*, and more.

This video file format is the standard for Internet streaming sites like *YouTUBE*, *Vimeo*, and more.

**.MP4**  
(.MPEG-4)

# WEB DESIGN

**This web language is used for the  
basic framework for all web  
design.**

This web language is used for the  
basic framework for all web  
design.

**.HTML**

This web language separates the content of a website from the design features, making it easier to make site wide changes to the fonts, colors, etc.

This web language separates the content of a website from the design features, making it easier to make site wide changes to the fonts, colors, etc.

**.CSS**

This web language creates enhanced user interactivity because it is easy to incorporate animation, audio, and video.

This web language creates enhanced user interactivity because it is easy to incorporate animation, audio, and video.

Flash

**This web language uses client-side web development, which is quicker and more secure.**

This web language uses client-side web development, which is quicker and more secure.

JavaScript

This web design language uses “tags” that denote structure elements like paragraphs, headers, lists, etc.

This web design language uses  
“tags” that denote structure  
elements like paragraphs, headers,  
lists, etc.

**.HTML**

**This web design language connects an HTML file to a database on an external server, creating dynamic websites with enhanced interactivity.**

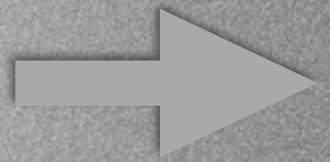

This web design language connects an HTML file to a database on an external server, creating dynamic websites with enhanced interactivity.

**.PHP**

# **FINAL JEOPARDY!**

**MAKE YOUR WAGER NOW !**

In audio and video, there are four file formats that are built well for streaming over the Internet.

**Name all four of them.**

In audio and video, there are four file formats that are built well for streaming over the Internet.

**.MP3**

**.WMA**

**.WMV**

**.MP4**
