

adobe Illustrator

SHAPE BUILDER TOOL

The Shape Builder Tool (Shift + M) is tool that allows you to merge and remove parts of object to quickly create more complex shapes.

1. EYE MONSTER

Use My Image as reference so your image will match mine! Use the shapes I have provide with the Shape Builder tool to remove the unneeded pieces!

MY IMAGE

YOUR IMAGE

2. HEART

1. Start by Drawing a perfect circle using the ellipse tool (L) and the Shift Key.

2. Using the anchor point tool (Shift + C) remove the curve from the bottom anchor point

3. Using your Direct Select Tool (A), pull that same anchor point down to get a tear drop shape.

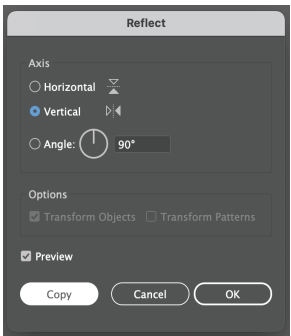

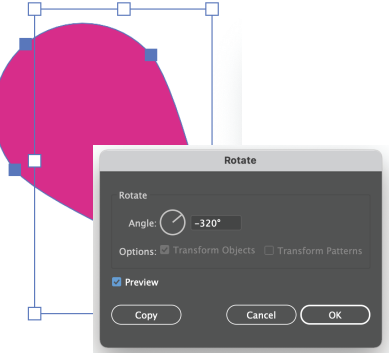

YOUR HEART

4. Select your tear drop and Right click > Transform > Rotate> 320 degrees > OK

5. Right click again > Transform > Reflect > Verticle > Make a copy. Then drag the copy over to the right.

6. With both objects selected, use the Shape Builder Tool (Shift + M) and while holding down the Opt/Alt key, remove the 2 triangles at the bottom.

COMPLEX SHAPES

Using the shapes I have given you, reference what I kept (solid) vs what I removed (open) while using the Shape Builder Tool (Shift + M) only to create your own shapes! You can will use the Scribble Actions to combine shapes and the Alt/Option key to remove shapes.

3. SPEECH BUBBLE

YOUR BUBBLE

4. BATMAN

YOUR BATMAN

5. GOLDFISH

YOUR FISH

6. CIRCLE LOGO

YOUR LOGO
